

QA Functional Tester

"We are looking for the independent thinkers, the fighters, the passionate, the creative, the defiant, and the determined! We hire for attitude and then for skill. If you are passionate about building Internet companies, we want to hear from you!"

[APPLY NOW](#)

Requirements

- Minimum three years of experience as a QA tester.
- Experience with automated solutions such as Cucumber/Calabash, Gherkin, Jira, Selenium or similar tools/frameworks.
- Experience with Python, PHP, JAVA or similar programming languages.
- Experience with source code controls like SVN, GIT, CVS.
- Familiarity with Continuous Integration and Delivery.
- Motivated and reliable problem solver with go getter mind-set.
- Degree in a technical subject.
- Fluent in English.

Responsibilities

- Automated testing of web and mobile applications.
- Develop automated scenarios/scripts using Cucumber (for web applications) and Calabash (for mobile applications).
- Optimize existing test cases to get more stability and efficiency.
- Run automated functional tests as well as performance and load tests.
- Analyze automated test results and report bugs to responsible employees.

Benefits

- Fostering of personal growth in a learning and resourceful environment.
- Easy-integration into a highly professional, international and passionate team.
- Competitive compensation package for living and working in Bangkok.
- Knowledge sharing from the best entrepreneurs and IT developers in the industry.
- An office in the heart of one of Asia's most international and lively cities.

About us

Rabbit Internet is a company builder and a venture arm of the BTS Group. We developed the unique Rabbit Internet Platform to bring growth to emerging Thai start-ups. We partner with entrepreneurs to build market leading Asian Internet companies and aim to serve the 600 million consumers in South East Asia by 2020.
